PROFILE

Financial crime analyst with nearly four years in AML and fraud investigations at Revolut and Amazon. Investigates **300+ fraud and transaction monitoring alerts a month**, has decided **630+ high-risk EDD cases**, and drafts SARs/STRs for **31 European FIUs** across the EEA and Switzerland. Uses SQL to find the trends and root causes behind cases, and builds tools that cut handle time.

EXPERIENCE

Revolut Mar 2025 – Present
FinCrime Analyst *Remote, India*

- Investigate **300+ fraud and transaction monitoring alerts every month**, reviewing account activity, counterparties and customer history to decide whether each case is legitimate or needs escalation.
- Traced funds across linked accounts in several EU countries to identify and escalate **5+ money mule and laundering networks** connected to drug trafficking.
- Draft **SARs/STRs for 31 FIUs across the EEA and Switzerland**, setting out who was involved, what happened, when and where, and why the activity is suspicious.
- Apply **EU AML Directive and German GwG, KWG and MaRisk** requirements when assessing customer risk and deciding what must be reported.
- Respond to **law-enforcement and regulator information requests** by compiling complete, accurate account and transaction records.
- Decided **630+ high-risk EDD cases** using a validation framework I piloted, which checks open sources and documents already on file before contacting the customer.
- Reduced unnecessary customer outreach requests by **40%+** through that framework, speeding up EDD decisions and reducing customer friction.
- Verify **source of funds and source of wealth** for high-risk individual customers by matching their declarations against documents and actual account activity.
- Conduct **periodic KYC reviews** to confirm that customer information remains accurate and up to date.
- Resolve **PEP, sanctions and adverse media screening matches** by confirming or ruling out a true match using identity details and open-source checks.
- Investigate **card-not-present and card-present fraud** by tracing each transaction through the card payment flow.
- Handle **chargebacks under card scheme rules** and share recurring fraud patterns with fraud strategy and engineering teams.
- Investigate **SEPA Direct Debit fraud**, identifying the accounts used to collect unauthorised debits.
- Built a **case note generator** that produces standardised investigation write-ups, cutting manual data entry for the team.
- Perform **four-eye checks and quality reviews** of colleagues' cases as a subject matter expert, with **99%+ accuracy**.
- Trained **7 batches of new investigators** as a Buddy Trainer, achieving an **85% probation pass rate**.

Amazon Feb 2023 – Mar 2025
Transaction Risk Specialist *Hyderabad, India*

- Investigated fraudulent customer activity by analysing **order patterns, account behaviour and fraud indicators** to decide on enforcement for high-risk accounts.
- Wrote **SQL queries for trend analysis and root cause investigations**, finding velocity spikes and the points where detection rules failed.
- Measured **false positive and false negative rates** on detection rules and shared data-backed rule changes with engineering leads.
- Recovered **$149,560** by detecting account takeover and bad-actor collusion networks and actioning the linked accounts.
- Resolved **fraud-driven negative balances** by holding further payments to the account and recovering the amounts owed.

- Built a case validation tool that cut per-task time from **90 seconds to 6 seconds**, reducing the team's average handle time by **12.7%**.
- Freed **10.4% of daily team capacity** with the same tool, moving time from manual checks to investigations.
- Maintained **98% decision accuracy** on high-risk account investigations while meeting SLA targets.
- Spotted emerging fraud trends, including **collusion, card-not-present abuse and ad abuse**, and reported them to program leads for action on accounts with **$10K–$50K** in transaction volume.
- Handled **senior escalations on account compromises and appeals** as the team's fraud prevention subject matter expert.
- Wrote investigation briefs for **Risk, Legal, Policy and Engineering leads**, summarising findings and recommended actions.
- Named **Employee of the Month 8 times** in Fraud Prevention for investigation quality and accuracy.

SKILLS

- **AML and regulation:** transaction monitoring, SAR/STR drafting, FATF Recommendations, risk-based approach, EU AML Directives, German GwG, KWG and MaRisk, law-enforcement and regulator requests.
- **Due diligence:** EDD, CDD, periodic KYC reviews, source of funds and source of wealth, counterparty due diligence, PEP, sanctions and adverse media screening, OSINT.
- **Fraud typologies:** money mules and pass-through accounts, structuring and layering, APP scams, account takeover, bad-actor collusion networks, ad abuse.
- **Payments and disputes:** card payment flows, card-not-present and card-present fraud, chargebacks under card scheme rules, SEPA Direct Debit fraud, fraud loss recovery.
- **Data and automation:** SQL, trend and root cause analysis, false positive and negative analysis, Looker, Advanced Excel, Google Sheets, case tooling.
- **Tools:** LexisNexis, Dow Jones Risk & Compliance, LSEG World-Check, OpenCorporates, Zendesk, SharePoint.
